### **GREETINGS**

Cancer is one of the leading causes of death worldwide, which is rapidly becoming a global pandemic moving to achieve the status by 2050

Not only is it devastating to the patient and to the near and dear ones, but also has a great impact on global economy. More than half of the cancers are preventable. A cancer control strategy definitely has to embrace an active preventable programme. Knowledge into action to ward off this disease is a real concern

With the motto, "I CAN, I WILL.."we can definitely help the society to reduce the cancer burden.

*Cancer survived is a life  
revived, cancer prevented is a  
life blessed!!*
